in plastic packaging*

Kaipak

Your honey packaging specialists.

Discover a plastic packaging manufacturer like no other...

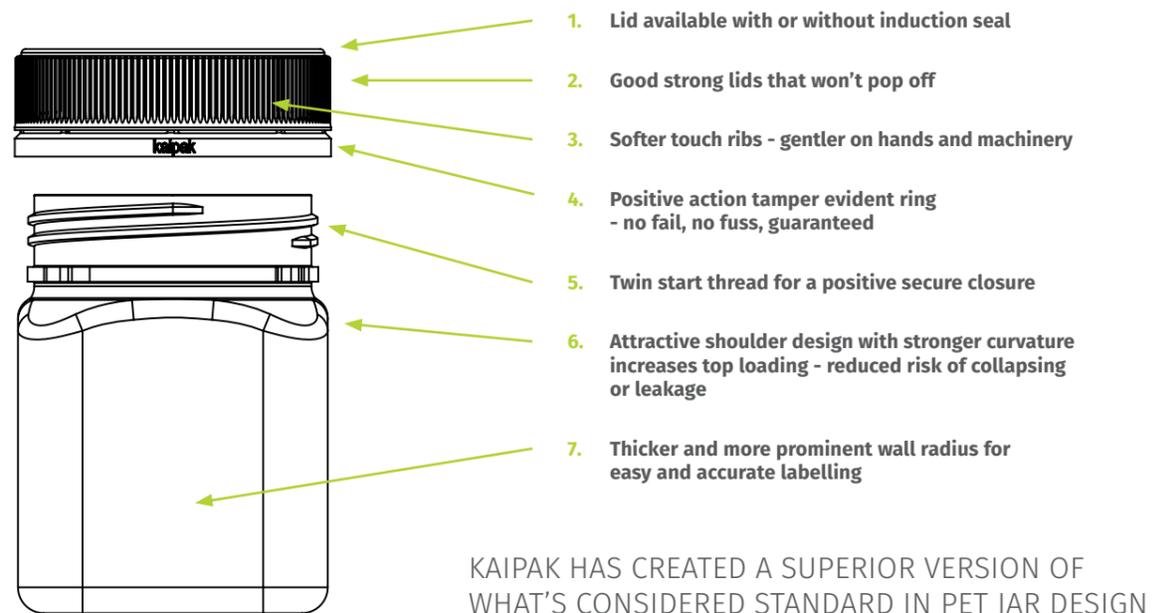

► Producers of premium honey jars

We've taken several aspects of the standard square and hex jars, and enhanced them. Our jars have been designed to make plastic packaging easier for you and more convenient for the end consumer.

With the unique features of our PET jars, you and the consumer get much more than a standard plastic container. And for your peace of mind, we personally guarantee each product against defects.

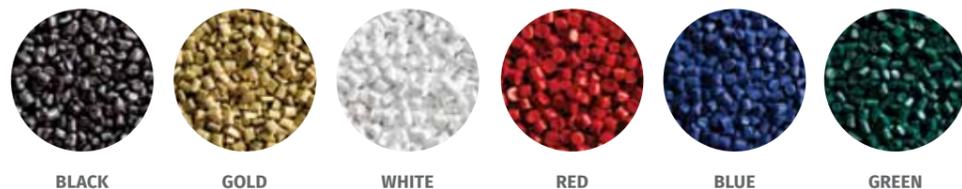

Features include; twin start thread for a positive secure closure, positive action tamper evident ring, thicker and more prominent wall radius for easy and accurate labelling (less chance of sucking/drawing in) and increased top loading capacity to make sure your end product stays as it should.

Our jars are proudly NZ made. We are confident you'll appreciate the quality.

► Plastic lids

Kaipak have given plastic lid design a human touch: our plastic jar lids are gentler on hands. And when it comes to colours, we've got you covered. Just pick a Pantone colour. Lids are available with or without foil induction seal.

We have a huge range of lid colours available, if it's not here - just ask!

Square Honey Jar

200ml (250gm)

Product Code: KPJ200-SA/SC
Standard Colours: Amber, Clear
Brimful Volume: 227ml approx
Material: PET

Weight: 21.5gms approx
Neck Diameter: 58mm
Pallet Quantity: 4256 units
